MMP Upgrade 2.50

In order to upgrade to v2.50, you must have already installed v2.00+
Please note that most of your files including admin area will be replaced during upgrade process. However your database will be preserved.

1. Backup Your Database

2. Make sure you have full site backup.

4. Unzip upgrade.zip into your mmp directory

3. Open your browser and point to http://yourdomain.com/upgrade.php
where yourdomain.com is the name of your domain. If you've installed mmp in other than root directory of your domain, than just add your install directory after http://yourdomain.com/ e.g.:
http://yourdomain.com/mmp/upgrade.php

4. Once install completed you'll see the message:
Installation Completed. Please delete upgrade.php
Make sure you delete the file.

WHAT'S NEW?

1. MMP is now fully responsive and themable
2. Completely rewritten and 20% faster
3. Added logo upload via admin configuration
4. Added user notes for user profiles
5. Added ssl settings for smtp mailer
6. Mysql driver is replaced with Mysqli
7. Manual user activation notification
8. Code and database optimization

Enjoy new mmp v2.50

Note: If you're getting database errors, make sure your server has Mysqli driver enabled. Ask your hosting company for help, if you don't have root access to your server.
