Requirements

Please ensure your web host meets the application requirements. The lists of requirements are:

Web Server Requirements

- Operating System: Linux, Unix, or Windows
- Web Server: Apache
- Scripting Language: PHP 5.2 or above
- Database: MySQL 5.0 or above
- PHP's GD extension with TrueType support (enabled in PHP 5.0 or above)

If you're unsure whether your server meets these requirements, simply ask your hosting provider.

Uploading Files

Unzip the Membersip Manager Pro package onto your local hard drive. If you don't have Winzip, you can download it for free here. Using an FTP program (such as Filezilla, which is free, or a commercial package such as CuteFTP), login to your web server and copy the Membersip Manager Pro files across into your base website directory. This directory is commonly called 'public_html', 'html', 'www' or 'website_html'. If you're not sure what it is, your webhost provider will be able to tell you.

File Permissions

Membersip Manager Pro requires the following files/directories to have 'write' permissions set. If you're running on a Linux or Unix web host, you can use your FTP program and use the 'CHMOD' ('Change Mode') function to grant writes permissions. If your host is running Windows, you will need to contact your hosting provider about setting up write permissions on these files/folders.

Folders, CHMOD these to757:

• /uploads/

• /admin/backups/

Note: Although it says 757, some webhosts may require 775 or 777 instead.

MySQL Database

Membersip Manager Pro makes use of a MySQL database to store your data. This database must be created before you run the Membersip Manager Pro installation wizard. Your MySQL user account should also have full grant access to that database.

You will need the database connection details during the setup wizard.

Setting up your database may differ with your webhost and what software they use for your web hosting control panel. If you don't know how ask your hosting provider.

Setup Wizard

Membersip Manager Pro includes a simple 3 step installation process. To start the setup wizard, navigate to the directory that you uploaded Membersip Manager Pro, for example: http://www.example.com/ The Membersip Manager Pro setup wizard will appear.

NOTE: Due to a completely rewritten script structure, and membership processing, there is no upgrade option available.

Gateway Setup

PayPal

PayPal Business or Premier account required
To setup your PayPal account do the following:
You'll need to setup your paypal account to execuite ipn.

1. Login to paypal.com
